CAREER OBJECTIVE

Software Engineering student with hands-on experience in game development, full-stack web applications, and a strong interest in cybersecurity. I genuinely enjoy the process of learning new technologies and adapting to different challenges. I am looking forward to bringing my background in tools like Godot, Python, and PHP to a collaborative environment. Above all, I am eager to work alongside a creative team, share ideas, and continuously expand my skill set while building software that makes an impact.

EDUCATION

Matrouh University

Matrouh, Egypt

Bachelor's Degree, Faculty of Computers and Artificial Intelligence (FCAI)

2024 – 2028 (Expected)

PROJECTS

AnderMagic (2D Platformer Game)

Godot 4.6, GDScript

Solo Developer | [View on GitHub](#)

Published

- Developed an immersive 2D platformer game utilizing the Godot engine, featuring custom pixel art aesthetics.
- Engineered core mechanics including character controls, physics, automated save systems, and state management.
- Published and iterated upon user feedback up to the stable release version 1.2.

Hide and Sink (Multiplayer Game)

Game Development

Co-Developer (Team Project) | [View on Itch.io](#)

Published

- Collaborated with a development team to design, construct, and release a complete indie game on Itch.io.
- Contributed to gameplay logic scripts, mechanic prototyping, and integration of audio-visual assets.

Car-Wash Booking System

PHP, JavaScript, MySQL, HTML/CSS

Full-Stack Developer | [View on GitHub](#)

Completed

- Built a full-stack web application to streamline automated booking and processing for car wash appointments.
- Designed a fully responsive frontend user interface and integrated it with a secure PHP backend server.
- Debugged and optimized database queries and client-server connectivity for high-reliability transactions.

SKILLS & INTERESTS

Programming Languages: Python, C++, Java, JavaScript, PHP, MySQL, HTML/CSS, GDScript, Bash

Tools & Frameworks: Godot Engine, Git, Linux (Debian, Kali Linux)

Cybersecurity: Penetration Testing, Vulnerability Discovery, Nmap, Burp Suite, Metasploit, Red Team Operations

Interests: Indie Game Development, Full-Stack Web Development, CTFs & Technical Hackathons
